Context

has context

Note that Observation occurs
in all 4 boxes. We are
therefore diambiguating the
word "Observation" - add this
to MS

When the value of one observation
process is constrained by another.
e.g., space, time, environment

Has context
is a good
candidate for
unpacking
semantics

Observation process ——follows—— Protocol

targets   generates data

Observed entity   Observation data

has characteristic   describes   uses standard

site, location, environment,
organizaitonal context,
project/investigation, sampling -
relational context in data space,
experimental design

Observed characteristic   Standard

color code each box
and creat an icon. The
icon will be used for
the collapsed diagrams
